

1/28:

Member: Fariha, Hanlu

Time length: 1hr

Progress:

1. Finish the database configuration and installation for Hanlu and Fariha
2. Discuss the lab instruction and lab task assigned for each team

1/29:

Member: Fariha, Hanlu, Yiwen

Time length: 1hr 30 minutes

Progress:

1. Finish the database configuration and installation for Yiwen
2. Determine the tasks assigned for each team member
3. Discuss collectively about the data extraction script and ways to connect with database properly (i.e., connection with SQL)

1/30:

Member: Fariha, Hanlu, Yiwen

Time length: 2hr 30 minutes

Progress:

1. Discuss and reach consensus about the database connection
2. Everyone continues to work on their own parts of scripts

1/31:

Member: Fariha, Hanlu, Yiwen

Time length: 1hr

Progress:

1. Run and debug all scripts to make sure that we all can connect to the database and obtain the desired outcomes

2/1:

Member: Fariha, Hanlu, Yiwen

Time Length: 15 minutes

Progress:

1. Make last minute changes to make all three scripts to be more consistent
